

GOALS

- Cultural Awareness and Values Education
 - Getting to know the food, music, dance, clothing, important places, and holidays of one's own culture
 - Accepting the existence of different cultures and respecting cultural diversity
 - Internalizing the values of tolerance, empathy, and respect
- Cognitive and Academic Skills
 - Observing, comparing, and distinguishing similarities and differences
 - Listening, understanding, and expressing oneself verbally
- Creativity and Artistic Skills
 - Ability to express oneself through painting, music, dance, and drama
 - Ability to create original works using imagination
- Social and Communication Skills
 - Actively participating in group work
 - Developing collaboration and sharing skills
 - Establishing effective and respectful communication with peers
 - Taking responsibility and developing a sense of duty
- Digital Literacy Skills
 - Safe and responsible use of age-appropriate digital tools
 - Creating digital content (posters, videos, presentations, etc.)
 - Using technology as part of the learning process
 - Behaving ethically in digital environments
- Family and Social Awareness
 - Experiencing learning and creating together with family
 - Acquiring cultural knowledge from elders in the family
 - Developing sensitivity towards social values
 - Understanding the importance of passing on cultural heritage from generation to generation
- Personal Development
 - Gaining self-confidence
 - Developing the courage to express oneself
 - Experiencing a sense of accomplishment
 - Developing a positive attitude towards learning

PROJECT AIM

- The aim is to enable students to recognize the cultural values of the society they live in, to become aware of elements belonging to their own culture, and to express these values correctly. During the project, students will learn the concept of culture through concrete examples such as cultural foods, dances, music, clothing, important places, and holidays.
- This project aims to help students accept the existence of different cultures, respect cultural diversity, and develop tolerance. While introducing their own culture, students will also have the opportunity to learn about and compare the cultural richness of partner countries, recognizing similarities and differences. Thus, they will be supported in gaining cultural awareness, empathy, and a multicultural perspective at an early age.
- Throughout the project, active student participation is prioritized, aiming to develop learning-by-doing, collaborative work, and creative thinking skills. Students' self-expression abilities will be strengthened through the use of art, music, drama, and digital tools; and social skills such as communication, sharing, and taking responsibility will be supported.
- Furthermore, the project aims to improve students' digital literacy skills through the use of Web 2.0 tools, enabling them to use technology consciously and safely. Strengthening school-parent cooperation through family participation and contributing to the transmission of cultural values from generation to generation are also among the project's important goals.
